OBJECTIVE

Find a Software Engineer position focused on developing web-based applications and debugging complex software problems.

PROFESSIONAL EXPERIENCE

Nakano Software, Tokyo, Japan
Team Lead

Dec 2004 → Oct 2012

- Led the design and development of three-tier, component-based architecture for CONNECT TM 5.0 using VB6, XML 2.0, MSDE, MS SQL Server 7, and Oracle 8.05.
- Mentored junior developers: assisted with code reviews, conducted technology discussion groups and presentations, act as resource for them.
- Liaised and assisted Nakano Software's Client Services, Professional Services, and Production Development and Sales Department with R&D issues.
- Responsible for source code controls and automated builds using Subversion

Soft Connections Inc., Sunnyvale, CA
Software Engineer

May 2001 → Nov 2004

- Reviewed design of proposed features and implementation of features by other engineers. Proposed enhancements and developed prototypes.
- Investigated script failures in automated tests.
- Provided feedback and contributed in test plan development, resource allocation planning, and test process definition/improvement.
- Worked closely with R&D and business analytics teams.

Software Central, San Jose, CA
Software Engineer

Apr 1999 → Apr 2001

- Participated and worked closely with developers at various developmental stages.
- Worked in tandem with support services and QA teams to improve product quality.
- Implemented major features on time and with exceptional quality.
- Acted as technical contact to device manufacturers to define requirements, and debug and solve problems.
